

Postdoctoral Researcher Position

A 1-year postdoctoral position (renewable) is available at the UNIS lab at Texas A&M University in Qatar, for an experimentalist on ultrafast laser induced Photonic Lattices, with related studies focused around nonlinear-optics, complexity and quantum physics. A solid background and experience is expected in the proposed areas.

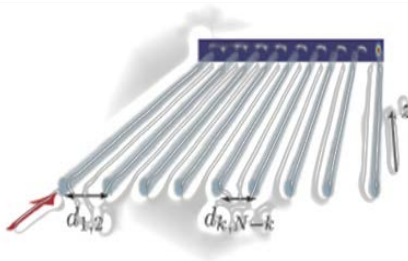

Candidate's application should include:

- CV with detailed information on studies, work experience in research, lists of publications, names of three known scientists who know the candidate and his research work
- Motivation letter

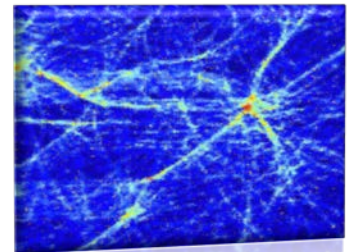

PHOTONIC LATTICES

Nonlinear Optics

Quantum Analogs

Complexity Physics

Applications and more information:
